NEW PAVIS WOVEN

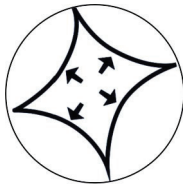

**DOUBLE
LAYER
TISSUE**
COTTON
ON THE SKIN

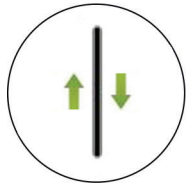

MAIN FEATURES

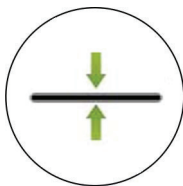

BREATHABLE

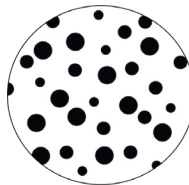

ELASTIC

SLIDING ON CLOTHES

LIGHT

ANTIBACTERIAL

Internal silicone ring, next to the elbow, and easy regulation system for a perfect adaptation to arm size

Belts are closing upwards (to lift the arm)

MAIN ADVANTAGES

- 1 Reduce pains and heals shoulders sub-luxation -> thanks to the upwards closure, the humerus head is held in its natural position, recreating the ideal symmetry of the shoulder joint
- 2 Reduce recovery time -> due to the textile and the design, the brace is particularly comfortable, therefore users can wear it all the day, recovering much faster than with other braces
- 3 It's easy to wear
